Why Build Grafana?

Agile

TTD

Continuous Delivery

Micro Services

Death Star Architecture

Lucasfilm

Observability

Time Series Database (TSDB)

Write & Query API designed for Time Series

Graphite

INPUT

```
apps.server1.counter.login.count    10    1398969187
```

QUERY

`prod.apps.*.counter.login.count`

QUERY

```
sumSeries(prod.apps.*.counter.login.count)
```

QUERY

```
movingAverage(scaleToSeconds(prod.apps.*.counter.login.count, 1), 5min)
```

QUERY

```
timeShift(prod.apps.*.counter.login.count, 1d)
```

Measure Anything, Measure Everything 2011

StatsD

```
stats.increment("logins")
```

Instrumentation

Build Dashboards

Low Adoption

Scratching your own itch

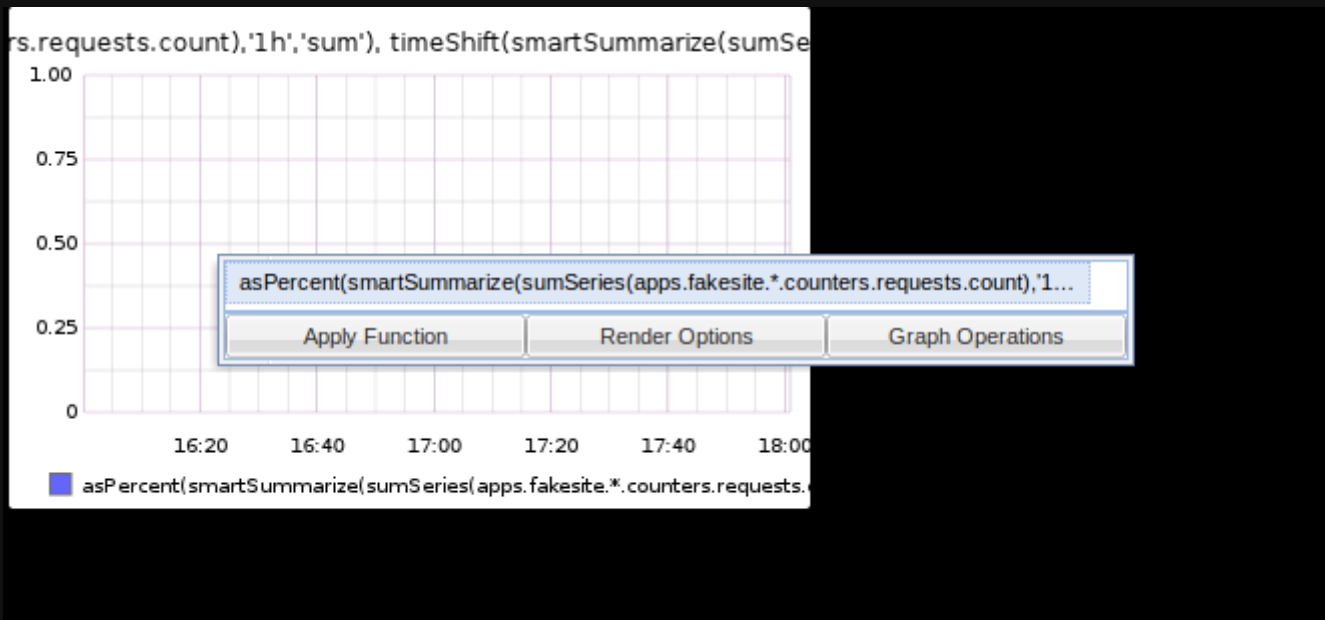

Accessible

```
movingAverage(scaleToSeconds(prod.apps.*.counter.login.count, 1), 5min)
```

A		apps		backend_03	counters	requests	count	+
---	-----------------------------------------------------------------------------------	------	-----------------------------------------------------------------------------------	------------	----------	----------	-------	---

Grafana Project

- First Release Jan 2014
- 13 feature releases
- 7180 stars on github
- 1055 forks
- 201 contributors

OpenTSDB

Elasticsearch

Graphite

Cloudwatch

Data Sources

InfluxDB

Prometheus

KairosDB

Zabbix

Gnocchi

OpenNMS

DalmatinerDB

Druid

Demo

Feature Overview

- Advanced graphing
- Powerful query editors
- Dashboards
- Dynamic queries and dashboards
- Multi tenant user / organization support
- Client side & server side rendering of panels

Graphing features

- Multiple y-axis
- Many many y-axis units and formats (bytes, SI units, etc)
- Bars, lines, points
- Series overrides
- Select region to zoom
- Legend values and placement options
- Multiple stack groups

Summary

Observability

Metrics

Power through UX

Whats next for the Grafana Project

- More people
- More visualizations
- Alerting

Q & A

- grafana.org
